

(f) How the crossing is drawn

one owner at the junction pixels, or two

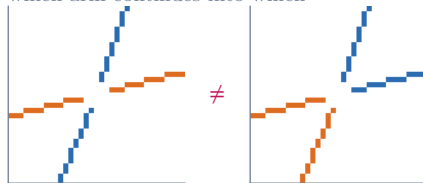

□ □ □ □ □ □ 0 of 6 pairs change

Measured: 4.8–19.9 % of PLECTA's pixels have two owners; flattening them all moves F_1 by 0.000.

(g) How the crossing is resolved

which arm continues into which

■ □ ■ ■ □ ■ 4 of 6 pairs change
